

VISITEX

PRESSURE SENSITIVE FABRIC

VisiTex is a unique adhesive backed printable fabric that is removable and can be placed on any non-porous flat surface indoors or outdoors. The adhesive will not remove paint, damage or leave residue to the surface when removed. VisiTex is a strong fabric that is re-positional for easy installation eliminating wrinkles or bubbles and will not tear.

VisiTex has been installed and used in many projects in extreme cold and hot weather conditions proving it can withstand almost any environment imaginable.

Vision used VisiTex most recently for NFL Pro Bowl in Hawaii at the Aloha Stadium and Ihilani JW Marriott.

VisiTex was installed outdoors in sub zero temperatures on the Centre Bell windows at the NHL Hockey All Star game in Montreal, Canada.
