

**FLEXIBLE**

## Vision FR Knit

Vision FR Knit is a 7.5 oz. 100% polyester poplin with a matte finish. Vision FR Knit is bath coated with a digital water-based, 100% biodegradable coating. The polyester yarn knit and special coating make it an easily printable fabric that is wrinkle and crease resistant. Vision FR Knit is compatible with direct disperse, UV, Latex and dye sublimation transfer printing. Available in widths from 61"-198".

All statements, technical information and recommendations about Vision Graphics substrates are based upon tests believed to be reliable but do not constitute a guarantee or warranty. All Vision Graphics products are sold with the understanding that the purchaser has independently assumed responsibility in determining the suitability of such product for its purposes. +1/-2 variance is allowed on all specs.

It is the responsibility of purchasers to independently verify, prior to use, the suitability of the products for their specific applications and print methods. SBR/Vision Graphics cannot be held liable for any misuse, damage or losses as specified in its product warranty. Subject to change without notice.

## Pockets on Back

Finishing Type 05 (and the previous type 04). Standard banner pocketing. Can be welded or sewn. The outside edge of the pocket can be aligned to the Live Area or Additional Material can be included. Options include single or double pockets and/or reinforcement.

## Pockets on Front

Finishing type 06. Standard billboard finishing. Can be welded or sewn. Options include single or double pockets and/or reinforcement. This type is most economical but limits the amount of bleed.

## Frontlit Bulletin Nomenclature & Measuring Guide

The terms and measurements required to accurately produce a Frontlit sign can be confusing. Communicating with everyone from artist to installer is simplified when everyone is speaking the same language.

Shown below in detail is a typical Bulletin with Pockets on the Front.

### Terms to Understand

- Live Area:** The area visible from the front after installation.
- Additional Material:** Any additional material added between the Live Area and the Finished Edge.
- Bleed:** Image that is printed beyond the Live Area to cover the edges of the structure or "Just in case" the structure measurements are slightly off or the image is not installed perfectly.
- Safety Margin:** An arbitrary distance from the Live Area inward to prevent critical copy/artwork from being too close to the edge.
