

PAPER FACED FOAM

The product known as Paper Faced Foam, Foamcore or Foam Board is a lightweight, easily cut material used for the mounting of photographic prints and other applications. It consists of three layers: An inner layer of polystyrene foam sandwiched between an outer facing of either a white claycoated paper or brown kraft paper.

The polystyrene core is engineered to be lightweight, but warp resistant and durable to retain its thickness and shape during printing, cutting and mounting. The paper faces accept vibrant inks and produce high quality print results.

Substrate Type	Trade Names	Sheet Construction	Applications	Why Choose This Material	Fabrication	Outdoor Use
Paper-Faced Foam	FomeCor	Extruded polystyrene center with clay coated paper liners	POP displays	Original graphics arts foam board.	Mounting	Not recommended for outdoor use
Clay Coated Paper Boards	Foam-X Insite High Strength: -Gatorfoam -Rynoboard	Black or white paper and core	Exhibits and Kiosks Framing Interior Signage	Great reproduction quality. Lightweight Competitively priced Edges remain closed when die-cut	Direct Digital Printing I-Cut Fluted Easels	

Gauges	Stock Sheet Size	Colors	THICKNESS GUIDE
1/8"	4ft x 8ft 4ft x 10ft 5ft x 8ft	White, white liner	
3/16" **, **	4ft x 8ft 4ft x 10ft 5ft x 8ft	White, white liner	
3/16"	4ft x 8ft	Black, white liner	
3/16" *	4ft x 8ft	Black, black liner
